features to challenge even experienced users. Having said that, you may want to check out some other software programs such as Photoshop Elements or Fireworks if you're a beginner. These other products are still image editors, but with a much simpler user interface. You can decide which program is best for you once you become more familiar with the basics.

High-speed laser ablation of povidone iodine for the treatment of bacterial vaginosis. The treatment of bacterial vaginosis (BV) with an intravaginal gel containing 2% povidone-iodine (PVI) has been associated with a reduction in vaginal recurrence of *Chlamydia trachomatis* and *Neisseria gonorrhoeae*. A new vaginal gel application method, described in the Health Products Regulation, is a peroral application of PVI-containing gel to the vaginal introitus. A new peroral PVI vaginal gel application and its use in the

treatment of BV is discussed. The invention relates to a fire-resistant wall panel of a building, such as a prefabricated wall panel used in a relatively small, fire-resistant building and, more particularly, to an ultra-high-strength building wall panel having one or more interior core elements located in an interior space of the wall panel. Prefabricated building wall panels of a fire-resistant type are known, for example, from EP 0 984 012 A2 or from EP 0 997 256 A2. In order to achieve a fire-resistant design of the wall panels, they are equipped with fire-resistant and/or fire-protection components, such as steel-reinforced concrete. In the

---

known panels, fire-resistant and/or fire-protection components that are located in the interior space of the wall panels are either made of steel or of fire-resistant materials. In the latter case, fire-resistant or fire-protection components are typically applied by means of an adhesive. This entails a complicated method that is time-consuming and expensive, and above all, which entails increased material consumption. It would therefore be desirable and advantageous to provide an improved fire-resistant wall panel of a building of the above mentioned kind, which obviates prior art shortcomings and is
